WORKING EXPERIENCE

E-LEARNING PLATFORM
Dan Energy/internship | April 2024 - july 2024
- Developed a web-based platform for managing courses with secure authentication (JWT), course enrollment, and user profile management.
- Utilized React with Redux for the frontend and optimized the backend using Node.js, Express, and MongoDB.

ECOMMERCE
Full Stack Developer | | 2024
Personal Project
- Created an e-commerce platform featuring product listings, user authentication, and order management.
- Integrated a payment gateway using Chapa and developed an admin dashboard with React and Tailwind CSS.

CHEAP DELALA
fullstack developer | | 2024
personal project
- Developed a platform connecting house buyers and sellers using Java and the MERN stack, with secure messaging functionality.
- Built an admin page for user and platform management. Utilized React, Node.js, Express, MongoDB, and PostgreSQL.
